ATTENDANCE OF THE MUSEUMS AND GALLERIES

The aim of this report is to show difference between attendance of different museums and galleries in England.

As you can see on the chart, I have collected information about the number of people visited that five museums and galleries in different ages. To start with, if we draw on a line, showing attendance of museums and galleries, we can see that British Museum in 2015 and 2017 has the biggest number of visitors, so it is the most popular place between shown institutes. Noticeable is that fact that Natural History Museum and Science Museum's visitors were decreasing in 2015, but in 2017 number of visitors started to rise.

Comparing stated museums and galleries, we can see that British Museum and Tate Gallery in 2015 had two times more visitors in 2015, while the Natural History Museum and Science Museum's visitors had decreased more than two times. Moreover, difference between 2015 and 2017 is always bigger than between 2015 and 2017. It means that period from 2015 to 2015 had changed rate of attendance stronger than another period.

To increase people's attendance museums and galleries should show only new things, painting and inventions to make their exhibition more interesting and exciting. Further more, museums and galleries should make better advertisements of their new exhibitions to make their institution more popular.

To sum, I can say that difference between had been changing, but institutions like museums and galleries will be always very popular among people, because they are always in interest of big number of people.

$$\begin{array}{l}
 PKB - 2 + 2 + 2 + 2 + 2 = 10 \\
 OT - 1 + 1 + 1 + 1 = 4 \\
 SD - 0 + 1 + 1 = 2
 \end{array}
 \left. \vphantom{\begin{array}{l} PKB \\ OT \\ SD \end{array}} \right\} 16$$
