ANSWER SHEET

ID number

11A915

This report is aimed to tell about the attendance of ^{Mm} Museums and galleries.

Drawing on the data given by SocialStatistics it is possible to say that attendance rate is increasing at all (British Museum, National Gallery, Tate Gallery). ^{u.l} But rates of AA National History and Science museums are not stable: 3,7 mln in 2013, 2,9 mln in 2015 and 3,5 mln in 2017. Though it used increased in 2017, there are chances that it will decrease back. ^{ts}

^{u.l} ~~It appears that~~ In 2017 there were more attendants in comparison with 2013. It appears that museums ~~are~~ attract more attendants than galleries do.

^{u.l} ^{opp.!} Our statistics are satisfiable, but not perfect. We can make them better using cheap ways. Firstly, we ~~can~~ use Internet ads. The Internet is the most popular thing nowadays, we can use ~~it~~ not only ads in it, but ^{do} organise ~~an~~ easy sorts of compe & actions, maybe com- petitions. As I suspect, results of using the Internet will be substan- cial. Firstly, Secondly, we can make staff to speak ^{to attendants} way more respec- tively by lear teaching them simple rules of etiquette. Thirdly, we can change the design of some museums, so they would be much more attractive interesting for people. New, ^{innovative} design means ^{not only} new attendants from all ²⁰⁰ over the world, but also will recall the previous visitors.

^{u.l} ^{u.l} In conclusion I would say that statistics of museums and gal- leries are satisfiable, althoug but we can easily improve them. ^{u.l} 229

$$PK3 = 2 + 2 + 2 + 2 + 1$$

$$OM = 1 + 1 + 1 + 1$$

$$DOM = 0 + 1 + 1$$
