Visits to national museums and galleries in England. Introduction.

This report is about visits to national museums and galleries in England. It represents the comparison of visits to museums and galleries for three separate years and recommendations to the museum boards of directors what could be done to increase people's attendance of cultural places.

2013.

According to the data of 2013, it is obvious that the Science Museum was the most preferable place among people. In contrary, the less visiting place was Tate Gallery (0,9 mln). It can be connected with the fact that Tate Gallery had been just opened. Natural History Museum was the second place which was often visited (3.7 mln).

2015.

For two years the data had changed significantly. The data of Science Museum shows that visits had decreased from 3.8 mln to 1.3 mln. It can be connected with the fact that people had already seen all exhibitions there. The visits of Tate Gallery had increased from 0,9 mln to 1.9 mln. Natural History Museum had become less visiting.

2017

The chart shows us that Science Museum was visited by 1.6 mln visitors. Tate Gallery's visits had grown up (2.2 mln). 1.9 mln visitors had been in Natural History Museum.

Recommendation.

It will be better if people who work in museums and galleries offer other people to visit their exhibitions. Also, exhibitions should be renewed twice a year.

Conclusion.

To sum up, I have compared data about museums
